Using the scenario given in the workbook, put the given problem into data terms (short answer question)

To find what factors lead to a successful kickstarter campaign based on the knowledge of: Project Name, Sub-Category, Category, date launched, deadline for goal, financial goal, amount pledged and number of backers.

Finding correlation between these factors will allow us to develop a model that can predict the success

*This response will be reviewed and graded after submission.*

Grading can be reviewed and adjusted.

Using the workbook and the 'Define' worksheet, select the **most relevant** questions for targeted analysis

Aaron

☒ Which main categories have a higher success rate?

☐ What is the sum of backers for each category?

☐ How many projects were cancelled?

☒ Which season or month has the highest rate of success?

☒ Which goal amounts have the highest chance of success?

☐ Which categories have the shortest average deadline?

**Correct**

What are the limitations of this dataset:

How many rows of data are available?  
(not including column headings)

☒ 73579

☐ 73424

☐ 73580

☐ 5971

Correct

What are the limitations of the dataset:

What is the time period covered by this dataset? (Project launched date)

☐ 01/01/2012 – 31/12/2016

☐ 01/01/2016 – 15/06/2016

☒ 01/01/2012 – 06/12/2016

☐ 31/12/2011 – 31/12/2015

Correct

What is the name of the project with the highest pledged amount?

☐ Bloodstained: Ritual of the Night

☒ Pebble Time – Awesome Smartwatch, No Compromises

☐ Pebble: E-Paper Watch for iPhone and Android

☐ COOLEST COOLER: 21st Century Cooler that's

Actually Cooler

- ☐ U-Dot Creative Space System

**Correct**

There is missing data in the main\_category column. What would be the best way to deal with this?

- ☐ Insert a '-' in the blank fields

- ☐ Delete these rows of data

- ☒ Find the associated category that matches the main category to input the values

- ☐ Take a guess based off the name and category

**Correct**

There are missing values in the 'state' column. How could you deal with this?

- ☐ Insert a '-' in the blank fields

- ☐ Delete these rows of data

Randomly determine the

- ☐ value from the list of values, using the % probability of each state

Compare goal amount with pledged amount – if pledged

- ☒ amount is greater than goal, then that project is successful

**Correct**

Is it possible to simplify the 'state' field?  
How so?

As we're looking to determine successful vs

- ☐ unsuccessful projects, delete the cancelled, live and suspended projects

Re-classify cancelled or suspended projects as

- ☐ 'Failed', and any 'live' projects that haven't yet met their funding goal as 'Failed'.

- ☒ No, all states are equally important to the analysis

- ☐ No, you should never simplify values

Incorrect

Can you determine how long a project was live for? How so?

☒ Yes – create a new column with `=([deadline]-[launched])` or `=DATE([deadline],[launched])`

☐ Yes – manually count the days between launched date and deadline

☐ Yes – create a new column with `=SUMIF([deadline] + [launched])`

☐ No – there's no way of knowing.

Correct

How can you join the two datasets together? (Select all that apply)

☐ Use Excel Power Query to Append the tables together

☒ Use Excel Power Query to Merge Queries

☒ Use VLOOKUP

☐ Manually copy the data from the first sheet and insert it below the other table

☐ There's no need to join the datasets together as you'll analyse each table separately

☒ Use INDEX/MATCH

Correct

In which year was the project with the highest number of backers launched?

☐ 2012

☐ 2013

☐ 2014

☐ 2015

☒ 2016

Correct

How many main categories have a higher success rate than the average success rate?

☐ 1

☒ 6

☐ 7

☐ 8

☐ 12

Incorrect

Click and drag the below to create a pivot table that shows:

- The average number of backers for successful projects per main category that were launched in 2015, with main category in your rows

### Sort elements

Correct

Based on your analysis of the timing of kickstarter projects, which month is the optimal month to launch your project?

☐ January

☐ March

☐ August

☒ October

☐ December

Correct

Create a new column in your dataset for the average pledge amount per backer.

Using this new column, what is the **Max** of average pledged per backer for successful projects in the 3D Printing Category?

☐ \$73.00

☐ \$497.63

☐ \$602.81

☒ \$2413.62

☐ \$44004.97

Correct

Of the following options, how many days should you set your project length for the optimal success?

☐ 21-25

☐ 26-30

☒ 31-35

☐ 36-40

Correct

Create a new column to show the **percentage** of the goal reached.

For **successful** projects, which category has the highest average of goal percentage?

☐ Chiptune

☐ Tabletop Games

☐ Playing Cards

☒ Typography

☐ Comics

Correct

Which **main category** had the highest *percentage increase* in **average pledged** amount from 2015 to 2016?

☐ Art

☐ Crafts

☐ Journalism

☒ Photography

Correct

For successful projects in the category of "Weaving", what is the average number of backers? (to 2 decimal places)

☐ 1.00

☐ 18.33

☐ 34.50

☒ 112.00

☐ 120.54

**Correct**

For projects in the category: Space Exploration;

Use Quartiles for the following questions. What is the IQR of Goal Amount?

☐ 12,500.00

☐ 15,000.00

☐ 23,070.25

☐ 55,075.25

☒ 76,926.25

☐ 96,524.25

**Correct**

For projects in the category: Space Exploration;

Use Quartiles for the following questions.

How many projects would be considered a **high outlier** on their goal amount?

☐ 3

☐ 9

☒ 11

☐ 23

☐ 31

Correct

For projects in the category: Space Exploration;

For **pledged amount**

What is the percentage rank of project ID 26843928 (Project name: SpaceVR: Step into Space) ?

☐ 44%

☐ 56%

☐ 87%

☒ 96%

☐ 100%

Correct

The following visualisation represents the success rate of different categories.

What's wrong with the below visualisation?

- ☐ The bars are too thin
- ☒ The x-axis starts at 10% and finishes at 30%, which is misleading
- ☐ "Journalism" is missing for some reason
- ☐ Nothing. It's absolutely amazing

Correct

How could you improve the below visualisation? (Select all that apply)

- ☐ Make the colour of "Design" red

☒ Add a descriptive chart title

☐ Exclude any that are under 2000 count

☐ Sort A > Z

☒ Sort largest > smallest

☒ Include a legend

**Correct**

For this final question, upload your most interesting finding from the dataset using the template provided

See the assignment instructions for further information

Upload your answer to this question.
